Abstract (en)  
[origin: EP2596841A1] The Lucky Ball Launcher is an instrument that propels a ball, with this propulsion being conditioned by the electrostatic energy that is carried or captured by the user as static electricity. The Lucky Ball Launcher contains an electrophorus (4) so that the user can charge static electricity and a Faraday cup (3) where the user can insert his/her hand so as to release the electrical charges that he/she has received or accumulated. The above-mentioned Lucky Ball (5) can take off on its path with a positive or negative spin , depending on the user's zodiac sign or biorhythms graphs on the day of use, should the user wish to use these parameters when playing... with energy and luck. ( Figure 31 )
