Abstract (en)

[origin: EP2596986A2] The vehicle (1) has a loading area (5) that is provided for platform (9). The platform is provided with outer dimensions which are adapted to loading area of main portion. A locking device is provided for securing platform on loading area. The locking device with locking retainer is set at platform and is optionally set into locking position or into release position. Several locking elements are provided for automatically set in locking position for fixing platform, when platform is passed to main portion. Independent claims are included for the following: (1) a platform; (2) a transportation system; and (3) a logistics system.
