Abstract (en)
[origin: EP2597213A1] The fitting (1) has an integrated housing (9) comprising a screw thread (10) for fastening at a counter thread at a water outlet of a sanitary outlet fitting. The housing has an outflow-side housing front end provided with flow holes (13). An insert element is insertable into the housing up to an introduction stop. A ventilated nozzle is designed such that a circumferential wall of the housing limits a ventilation channel in a double-walled configured portion. The channel opens to housing front end and into a ventilation opening (15) that is guided in an inner space of the housing.
