Abstract (en)

[origin: EP2597226A2] The mounting structure (100) has an elongated carrier element (102) having through-hole structure (104), which is formed in each case to accept a screw at a selectable position along the through-hole structure around the attachment element at a cavity (130). The personal guard equipments (110) are fastened at the carrier element. The personal guard equipments are screwed or welded onto the carrier element which comprises a metallic support plate. An independent claim is included for mounting arrangement.
