Abstract (en)

[origin: EP2597404A1] A device for adjusting the closing position of a sliding door (1) for cold storage room having a body (2) with vertical, lateral sidewalls (3) connected on an upper side (5) and on a lower side, at the upper side (5) there being present a guide (15) fixed to a wall (7) of the cold storage room in which there is provided an opening (10) on which the door (1) is adapted to be enclosed, a member (17) for supporting and guiding the door (1) fixed to such body (2) being sliding in such guide and provided with the aforementioned adjustment device. The latter comprises a first portion (25) fixed to the door (1) in rigid position and a second portion (60) bearing the sliding element in the guide that can be positioned and locked in a plurality of different angular positions with respect to such first position (25) so as to allow a different positioning of the door to the wall (7).
