Abstract (en)
[origin: WO2012013285A1] A plastic container preferably for food, with a lower part (1) which forms an inner receptacle for food or other items and which has at least two side walls (3) separated from one another via edge regions (2), and with a lid (6) which serves to cover the receptacle and can be secured to a rim of the lower part (1), which lid can be pulled off the plastic container by hand from an outer edge region (2) of the plastic container that forms an access corner (9), wherein, in the region of the edge region (2) forming the access corner (9), a peripheral contour (15) of the plastic container that extends along the rim is offset inwardly with respect to the other edge region (2).
