Abstract (en)

[origin: WO2012013602A1] The invention relates to an optical module (1; 1') of an illuminating and/or signalling device of a motor vehicle, comprising a reflector associated with a light source, especially comprising an LED, for reflecting light originating from said light source, said reflector being formed on one, especially monolithic part, that is a part produced from a single component, provided with a cooling opening (50) for the circulation of cooling air.
