Abstract (en)

[origin: WO2011154858A1] A connecting device of an arm, in particular a firearm (1), especially a pistol or the like, to a support for the arm, in particular a holster for housing the arm, preferably associable to a body of a user of the firearm, comprises means (CF) for activating safety means (CP) when the arm (1) is associated to the support means (3), and for deactivating the said safety means (CP) when the arm (1) is deassociated, in particular distanced, from the support means (3).
