Abstract (en)
[origin: WO2012013446A1] The invention relates to an electrical connection having at least one plug contact element (10) and a connection wire (1) which is connected to the plug contact element (10), wherein the connection between the at least one plug contact element (10) and the connection wire (1) is established by means of at least one force-fitting connection (12, 13) which is in the form, in particular, of a crimped connection. According to the invention, provision is made for the force-fitting connection (13) to additionally be provided with a cohesive connection (15) or a soldered connection.
