Abstract (en)

[origin: EP2599721A2] The packing machine has a feeding section for feeding the primary packings (1), a filling station for filling the primary packings, and a closing station for closing the filled primary packings. A sterile closable transport container (20) is provided for receiving the primary packings and is movable by a carriage (9). A sterilizing station is provided for sterilization of the transport container, particularly together with empty primary packings. An independent claim is included for a method for sterile filling of a product in a primary packing.
