Abstract (en)
[origin: EP2599727A2] Disclosed is a dual pack. The dual pack includes a main body having an air pore for passage of air, a storage body configured to receive content therein, the storage body being located within the main body, and a water entrance/exit member configured to penetrate the main body and be connected to the interior of the storage body. The main body and the storage body are flexible, and an inner surface of the main body is separated from an outer surface of the storage body.
