Abstract (en)

[origin: EP2599931A1] The extendable awning assembly comprises a box shell (1) connected at its ends to end plates (2) rotationally supporting ends of a winding bar in which an awning canvas is wound, and a pair of supports (8) fixed to a wall or ceiling. Each of the supports (8) comprises a support guiding element (9) arranged in a direction transverse to the axis of the winding bar, and each of the end plates (2) has a plate guiding element (10) which is inserted and slid in said support guiding element (9) to a working position. The assembly includes fixing means which in one embodiment comprise provisional elastic fixing elements and permanent fixing screws for fixing the end plates (2) to the supports (8) when they are in said working position.
