Abstract (en)
[origin: WO2012017176A1] Securing system (1, 2) for securing a dispenser (3), such as a pump, onto the neck of a reservoir (41) to constitute a fluid product dispenser, the dispenser being removable by removing the securing system (1, 2) from the neck (41), the system (1, 2) comprising a securing ring (1) and a rigid band (2) fitted around the securing ring (1), the ring (1) comprising a skirt (14) intended to be engaged around the neck (41), this skirt (14) comprising securing tabs (15) intended to engage in a securing manner with the neck (41), characterized in that the skirt (14) further comprises at least one abutment tab (16) intended to abut axially against the neck (41) when an attempt is made to refit the securing ring (1) onto the neck (41) after the dispenser has been removed for a first time.
