Abstract (en)
[origin: WO2012016295A1] A marine vessel comprises at least two hulls 2 and a portion 1 disposed between the two hulls 2, a propulsion system 5 operable using a gaseous fuel, and a storage means 3 for containing a supply of gaseous fuel for a propulsion system 5, the storage means being accommodated in the portion 1 between the two hulls 2. The storage means may be further protected from damage where the gaseous fuel storage is placed in the marine vessel a significant distance aft from the bow and the space forward of the storage means is deformable in the event of a collision.
