Abstract (en)

[origin: EP2415880A1] The coke- and titanium-containing aggregate comprises carbonaceous coke (45-80 wt.%), which contains temperatures volatile organic substances of less than 10 wt.% based on the carbonaceous material at the given reaction site, titanium containing material (20-55 wt.%), and other metal oxides and/or metal hydroxides (50 wt.%). The coke- and titanium-containing aggregate has a water content of 0.1-15 wt. % and a particle size of 100 µm. Independent claims are included for: (1) a method of accelerating the formation of highly refractory titanium carbides; and (2) a method of producing a coke and titanium-containing aggregate.
