Abstract (en)

[origin: WO2012016878A1] In order to provide a device for drying workpieces after a cleaning operation, comprising a vacuum chamber for the vacuum drying of a workpiece to be dried, which makes it possible for a workpiece that is to be dried to be dried largely without any residual soiling, it is proposed that the device comprises at least one blowing nozzle which opens out in the vacuum chamber and by means of which the workpiece to be dried can be exposed to a blowing medium.
