Abstract (en)

[origin: WO2012016861A1] The invention relates to a sensor arrangement comprising a torque sensor (3) for measuring the torque acting on a first shaft (1, 2) and comprising a rotational angle index unit. The first shaft (1, 2) is supported by at least one bearing (6), the seal (7) of said bearing comprising a magnetic index encoder (7, 8, 9, 10) that is detected by at least one magnetic field sensor element (5).
