Abstract (en)

[origin: WO2012016618A1] The invention relates to a drive for a switch disconnecter with C or O switching capacity with a switching pin acting as switching contact, with a spindle drive driven by an electric motor and having a spindle nut, wherein an actuating element, which is loaded by a compression spring and is capable of pivoting about a fixed pivot point, is acted upon by the spindle nut, wherein the actuating element for its part interacts with an actuating apparatus which actuates the switching pin.
