Abstract (en)
[origin: EP2602542A1] The lighting device (6,6') has a housing with a base body, where an end cap (3) is provided at an end side for making electrical contact with an electrical power connection. The base body and multiple light emitting diode light sources are rotatably mounted on the end cap. The emission of a cone of light is adjustable to a longitudinal axis (A) of the housing.
