Abstract (en)
[origin: WO2012019259A1] An adjustable accessory for sun protection of the face designed to the rest of the user's head in a pillow (2), said pillow is mounted in a metal frame (8) that sustains a protection screen (9) that acts as an umbrella, comprising also an hinged device (6 or 7) that enables adjusting of the inclination angle of said screen (9), that angle corresponds to the part of the user's face to be protected of the sunlight. The model also includes a variation of the geometric shape of the metal frame, which aims a better adaptation to the type of soil where is placed.
