Abstract (en)
[origin: EP2407432A1] The present invention is directed to a composition for triggering microbiological processes in water, comprising: a) one or more chemoheterotropic microorganisms capable of decomposing water-immiscible substances; b) at least one source of oxygen and/or at least one oxidizing agent; c) at least one source of P and N; and d) at least one substance capable of immobilizing components a)-c).
