Abstract (en)

[origin: WO2012019574A1] The invention relates to a method for reprocessing solid, organic waste occurring in plant oil production, for example palm oil production, said waste being mainly composed of pressing residues of the oil plants and/or oil seeds and oil-containing wastewater, by hydrothermal carbonization (HTC), wherein the oil emulsified in the wastewater is sorbed by the carbon-rich solids arising from the solid waste.
