Abstract (en)

[origin: WO2012019892A2] The present invention is a domestic refrigeration, which comprises: at least one rack (20), for accommodating articles which are to be cooled; a rod (24), which extends longitudinally above a front wall (26) of the rack (20), at a distance apart from this wall, and forms the gap; a separating element (30) with a body (38), which is fastened on the rod (24), and with an arm (32), which extends transversely in the rack (20). A lug (34) on the separating element (30) extends from the body (38) in the direction of the front wall (26) of the rack (20) and is visibly accessible in the gap.
