Abstract (en)
[origin: EP2604385A2] The crimping pliers has clamp that includes jaws (1,3) which are provided with die (2) and punch (4) respectively. The jaws are hingedly attached to each other on axis so as to pivot between open and close positions. The jaws are connected together to limbs (6,8) so that clamp is moved between appropriate crimping position and remote position at which the jaws are separated from each other.
