Abstract (en)

A machine for packaging products in mesh casings, comprising a packaging station (3) of products in casings made from a first section (4) of predetermined length of a tubular mesh (5) inserted and compacted along a first tubular support (6), an automatic insertion and compacting station (8) of a second section (9) of predetermined length of the tubular mesh (5) along a second support (10), to replace the first support (6) when the first section (4) of tubular mesh (5) has run out, said insertion and compacting station (8) comprising a head (23) that is mobile between an upper position and a lower position respectively corresponding to the upper portion (12) and to the lower portion (11) of said second support (10). The aforementioned head (23) comprises fastening means (26) for the free end (7) of the tubular mesh (5).
