Abstract (en)

The device (ARV) has an adhesive strip (KS1) glued at sides e.g. upper side (OS), inner side (IS) and outer side (AS), of a pipe coiled bundle (RRB). Adhesive force and breadth of the strip are formed such that adhesion between the strip and a pipe (RO) of the bundle is not detached by stress of the pipe. A setting unit (UB) encloses the sides of the bundle and has a barrel hoop that is made from steel or plastic, where length of the strip corresponds to sum of height of the bundle and double winding thickness of the bundle. The strip runs perpendicular to the inner side of the bundle.

Abstract (de)

Eine Abrollvorrichtung (ARV) für einen Rohrringbund (RRB), die Vorrichtung (ARV) umfassend wenigstens einen Klebestreifen (KS1, KS2), der eingerichtet ist, an drei Seiten des Rohrringbunds (RRB), nämlich einer Unterseite (US), einer Innenseite (IS) und einer Oberseite (OS) des Rohrringbunds (RRB) verklebt zu werden.
