Abstract (en)
[origin: EP2604765A2] The fastening arrangement (1) has a mounting base (5), and two fastening elements (6) which are anchored in the mounting base. A mounting object (3) is arranged to the mounting base at a preset distance (A). A stiffening element (17) is arranged between the fixing elements and in the region between the mounting base and the mounting object so that force acting transversely to the fastening element at mounting base is counteracted.
