Abstract (en)
The present invention relates to lattice girders, methods for the production thereof and the use thereof. The lattice girder according to the present invention comprises two base joists and a top joist, said joists forming edges of a triangular prism, wherein each of said base joists is joined to said top joist via two or more truss members comprised of a wire which is connected to said base joist in N locations and to said top joist in N - 1 or N + 1 locations, wherein N is an integer greater than 1.
