Abstract (en)

[origin: EP2604782A1] The window sash structure (4) of different height levels, has a fold region (11) for receiving a block bridge (20), a stretcher block (21) and a glazing (2). Three different elements are provided for frictional and positive mounting of block bridges of various geometric dimensions. The elements are functional groove, fastening bar (12), circular portion or spring element (18).
