Abstract (en)
[origin: EP2604955A2] The multipurpose cooling device (101) has several interconnected cooling elements (103) having a planar surface (105) for producing a coolable storage area (107) and a concave surface (109) for producing contacting surface to a cooling object (111). The cooling elements have a cavity for coolant. The separable hinges connect the cooling elements.
