Abstract (en)

[origin: WO2012062250A2] The invention relates to a method and an associated device for drying humid air from a working chamber of a water-bearing machine, in particular a dishwasher. Said method comprises: providing the humid air in the working chamber at a temperature between 40°C and 50°C, providing a cooling medium in a heat exchanger at a temperature less than 20°C, and conducting the humid air from the working chamber, which has been temperature-controlled in such a way, through the heat exchanger.
