Abstract (en)

[origin: WO2012022613A1] The invention relates to a key lock (10) which can be used particularly flexibly and cost-effectively. For this purpose, the key lock (10) according to the invention has a communication device (25) for wire-free linking of the key lock (10) to an actuating mechanism (115), as well as a cable-independent power supply device (50) for autonomously providing the electrical power required for operation of the key lock (10).
