Abstract (en)
[origin: WO2012022655A1] The lint filter (5) is provided for a laundry treatment device (1), wherein the lint filter (5) has an overflow (13) in a side wall (8b). The laundry treatment device (1) has an accommodation space (23) for the lint filter (5), a liquid channel (15) for connection to the overflow (13) of the lint filter (5), a sensor chamber (16) which is connected to the overflow (13) via the liquid channel (15), and at least one moisture sensor (17) which is accommodated in the sensor chamber (16). The filter insert (6) for the lint filter (5) has a polymeric spun-bonded nonwoven as a filter material.
