Abstract (en)

[origin: WO2012022583A1] The invention relates to a refrigeration device, in particular a domestic refrigeration device (1), comprising a heat-insulating inner container (4) which forms a storage chamber (3) for the goods to be cooled, at least one shelf (8) for supporting the goods to be cooled, and at least two retaining grooves (7) for the shelf (8), which are arranged opposite each other on the inner container (4), also comprising a carrier rail (9) comprising a securing section (12) which is designed to be inserted into the retaining groove (7) in order to secure the carrier rail (9) to the inner container (4), and a guide section (14) which is designed to displace the shelf (8) so that it can be retractably mounted on the shelf (8) in the storage chamber (3).
