Abstract (en)  
[origin: WO2012022483A1] An electrical wall bushing terminal (1) having a housing (2) and having a contact device (3) on which a plug zone (4) is provided for holding a test and/or disconnecting plug (5). A first conductor connection (6) is provided, and is connected to a first contact unit (7) of the contact device (3). A second conductor connection (8) is connected to a second contact unit (9) of the contact device (3). The housing (2) has insertion openings (12, 13) on two sides (10, 11), of which in each case one test and/or disconnecting plug (7) can be inserted into the plug zone (4) in order to make contact with the first and second contact units (7, 9).
