Abstract (en)

Assembly (1) for product exhibitors, such exhibitors (2) comprising a supporting frame (3) for a panel (4) for accommodating at least one laminar element (5). The panel (4) comprises coupling means for at least one first component (6) selected from at least one batten (7) and at least one laminar element (5), and sliding anchoring elements (8) for at least one second component (9) selected from at least one laminar element (5) and at least one batten (7). The second component (9) is slideable along the anchoring elements (8) along a direction which is parallel to an edge (10) of the at least one first component (6), defining, along the sliding stroke, at least one configuration of juxtaposition of a corner edge (11) of the at least one second component (9) with the edge (10) of the at least one first component (6).
