Abstract (en)
[origin: EP2606982A2] The system (10) has wax supply systems (62a,62b) for feeding the heated wax. One of the wax-supply systems connected to the frame unit (30) has several upwardly directed supply ports, whose arrangement corresponds to the arrangement of supply ports at the bottom of the vehicle chassis. The frame unit is fixed at working position (20) or between the working position and change position, and comprises movable frame receiver (32), and removable frames (34a,34b,36a,36b) which are placed in a defined position on the frame receiver. The feed ports are provided on the removable frames.
