Abstract (en)
[origin: EP2607283A1] In an elevator apparatus, a machine base that supports a hoisting machine and a counterweight rope fastening member is fixed to upper portions of counterweight guide rails. First and second side beams are disposed in an upper portion inside the hoistway. The first and second side beams are disposed on two sides of a car when viewed from directly above, and are fixed to the machine base or upper portions of the counterweight guide rails and upper portions of the car guide rails. Tension from first and second suspending means that acts on first and second car rope fastening members is supported by the first and second side beams.
