Abstract (en)

[origin: EP2607290A1] The hook-type handling device (1) is provided with an attachment opening (6) and two lateral suspension openings (8,9) arranged symmetrically to it. The handling device is inclined beyond a maximum permissible relative angle of inclination (W,W') during use. An indicator arrangement (23) indicates an inclined position of the hook-type handling device that goes beyond the maximum permissible relative angle of inclination. An indicator element (24,24') is formed as an edge indicator (25,25').
