Abstract (en)
A washing machine with water accumulation tank comprises a containment body (102) having a washing compartment (C1) inside of which there is a rotary drum (104) for receiving the laundry to be washed. The containment body (102) has a side wall (106) defining a ring-shaped hollow space (C2), which constitutes a water accumulation tank, which is connectable to the washing compartment (C1) for receiving and accumulating at least a portion of the water contained in the washing compartment (C1) during an operating cycle of the washing machine (100).
