Abstract (en)

[origin: EP2607554A1] The element has a sound-related component and side parts (21') arranged on sides of the sound-related component. An upper flange (8) and a bottom chord are connected horizontally above and below wall elements. The upper flange and the bottom chord have receiving chambers (12, 13) at respective ends. Module bodies (14, 15) are arranged in each receiving chamber. Each side part is connected to the module bodies, the upper flange and the bottom chord. Insertion elements pass through the side part of each module body in the upper flange. An independent claim is also included for a noise protection wall.
