Abstract (en)

[origin: EP2607565A1] The support (14) has cedar roof supports attached in end regions of the support, which has a curved or broken curvature in a longitudinal direction (L). A continuous, upper belt (42) includes a connecting device for cedar rails of roof awnings. Right and left vertical bars (36, 38) and a vertical ridge bar (40) extend between the upper belt and left and right lower belts (44.1, 44.2). A gusset plate (20) is provided in a lower belt region. The left and right lower belts are attached to the plate. Right and left diagonal bars (32, 34) are attached at the plate and/or the lower belts. An independent claim is also included for a cedar roof support device.
