Abstract (en)

[origin: EP2607575A1] Fixing system for fixing a fence to a support. The fixing system comprises a fixing element and a clasp part complementary to the fixing element. The fixing element comprises a base and a support clasp part. The base is provided with a first through hole that is provided with a constriction, such that a tightening element is blocked and allows securing by displacement of the tightening element along the end part. The fixing system is provided with a sealing cap. During the securing, the tightening element is entirely contained within the first through hole. The sealing cap, in use, is also entirely contained within the first through hole.
