Abstract (en)
[origin: EP2607602A1] The sun protection device (1) has a sun protection hanging (2) rollable on a shaft (3). The sun protection hanging consists of an arrangement of disks connected behind one another in rolling direction by hinge connection. The disks have multiple arrangements of disk segments and are rigidly formed such that they retain their shape during rolling on the shaft. The disks are integrally formed and extend over the entire width of the sun protection hanging. The disks consist of plastic, aluminum or stainless steel.
