Abstract (en)

[origin: EP2607604A2] The locking strip (100) has a locking ring (30) which is provided for receiving a fastening element (60). A separation point (31) is provided for isolating the anti-glare plate (50) into individual strip modules (10,10a-10d). The separation point is provided in the region of the locking ring for symmetrical isolation. The three locking rings have a separation point for separating the locking bar anti-glare plate into individual strip modules so that the two individual strip modules have a distinct length. An independent claim is included for method for providing frame device.
