Abstract (en)

[origin: EP2607786A1] The bent tube (10) has two bent tube sections arranged concentric to two longitudinal axes. The two longitudinal axes are arranged at right angles to each other. The two bent tube sections are connected to each other by a bent section (15). The latter bent tube section has a smaller length than the former bent tube section. The latter bent tube section has a positive connection, particularly in the form of a threaded connection for connection with an exhaust pipe of the heating system and a sealing unit for the arrangement of a sealing element, particularly in the form of an O-ring.
