Abstract (en)

[origin: EP2607799A1] An air conditioner according to one embodiment of the present invention comprises a main body (4); and an air discharger (8) installed in the main body (4), wherein the air discharger comprises an air discharging opening (G) through which the air of the main body (4) is discharged and a light emitting unit (32) corresponding to the shape of the air discharging opening (G). An air conditioner according to one embodiment of the present invention comprises a main body (4); and an air discharger (8) installed in the main body, wherein the air discharger (8) comprises an air discharging opening (G) through which the air of the main body (4) is discharged and a light emitting unit (32) corresponding to the shape of the air discharging opening (G); and further comprising a controller varying the setting of the light emitting unit (32) in accordance with operating state or the user's input.
