Abstract (en)
[origin: EP2608154A2] The method involves reading a trailer data (10) by automatizing a data acquisition device (20) and reading another trailer data (12) by automatizing another data acquisition device (24) into a toll device (6), where the trailer data are stored in the toll device. The trailer data are transmitted to a central computer (30) before starting the journey from the toll device over an air interface (28) or the trailer data are detected and stored in the central computer. The stored trailer data are transmitted and stored in the toll device.
