Abstract (en)  
[origin: WO2012024703A1] The invention relates to a pull-out guide (4) for drawers (3), comprising a body rail (5) to be fastened to a furniture body (2), a drawer rail (7) to be fastened to the drawer (3), and a center rail (6) movably mounted between the body rail (5) and the drawer rail (7), wherein the relative motion sequence of the rails (5, 6, 7) is determined by means of a forced control unit (10), wherein the forced control unit (10) has a synchronization wheel (9) designed as a gear wheel, which interacts with a running surface (5a, 5b) arranged or formed on the rails (5, 6, 7) and/or with a running surface (5a) of a carriage (12, 13), which is slidably mounted between the rails (5, 6, 7), wherein an overload protection mechanism (11) is provided, by means of which the forced control unit (10) of the rails (5, 6, 7) can be reversibly lifted.
