Abstract (en)

[origin: WO2012026963A2] Systems and methods are for aerosolizing and delivering therapeutic substances in a device (10) with airflow regulation. Calibrated airflow resistance elements (21) and settings enable adjustment and control of flow velocity and/or flow volume of air, aerosolized air, and/or entrained aerosol particles, through the device, for optimal aerosol delivery among diverse conditions and applications.
